

**For Immediate Release
June 1, 2023**

MARCIVE, Inc. to be at this year's ALA discussing DEI Initiatives

San Antonio, TX— June 1, 2023

Besides speaking to libraries regarding data remediation services and GPO cataloging, attendees can visit Booth #1718 to meet with a MARCIVE team member regarding our DEI initiatives.

MARCIVE works with libraries to provide catalog enhancements for marginalized groups such as undocumented immigrants, former slaves, and other people of color. Of note is the recent project for Saskatchewan Information and Library Services (SILS) Consortium in which we enhanced their catalog by replacing 1100+ outdated and inaccurate Indigenous subject headings. Constantly updating our authorities processing capabilities, we now offer two robust processing options using the Homosaurus vocabulary, providing optional authority records as needed.

Feel free to request a private meeting to discuss your library's goals at info@marcive.com.

MARCIVE, Inc. has been providing unique and economical solutions for catalog enhancements since 1981 to libraries of all kinds.
